Portfolio : https://salonigavde.vercel.app

Skills

- **UI/UX Design**: Figma, Prototyping, Wireframing, User Research, Usability Testing, Interaction Design, Accessibility Design
- **Front-End Development**: HTML5, CSS3, Tailwind CSS, GSAP, React.js, Responsive Design
- **Programming Languages**: Java, JavaScript
- **Tools and Technologies**: Git/GitHub, Docker

Projects

- **Clothing Brand Website**: Designed and developed a responsive clothing brand website with a modern, intuitive interface that enhances user experience and aligns with the brand's aesthetic.
- **Apple Website Clone**: Built an interactive React.js and Three.js website clone, incorporating animated features and a responsive layout, which increased user engagement by 40%.
- **Amazon E-commerce Platform**: Replicated a fully responsive e-commerce platform using Firebase, Stripe, and Node.js, optimizing the user interface and enhancing the shopping experience with real-time updates and a 30% improvement in payment speed.
- **Blog Application**: Engineered a clean, responsive blog platform with Tailwind CSS, improving UI design and reducing load times by 25% to enhance user experience.
- **Real-Time Chat Application**: Created a real-time chat application using Socket.io, providing a seamless user interface and supporting 500+ daily messages for smooth real-time interaction.
- **Movie Review App**: Developed a ReactJS-based movie review app, boosting user engagement by 25% and improving app performance, reducing loading speeds by 30%.
- **Automated Billing System**: Engineered an AI-driven checkout system with an intuitive front-end, achieving 98% accuracy and reducing customer wait times by 40%.

Work Experience

JP Morgan Chase & Co. — Remote
Software Engineering Virtual Experience — *July 2024 - Aug 2024*

- **Streamlined Development Setup**: Reduced development setup time by 25% with automated scripts and configuration improvements.
- **Debugging and Restoration**: Restored 70% of application functionality by debugging complex codebases and rectifying logical errors.
- **Enhanced Data Monitoring**: Integrated live data visualization, improving real-time monitoring efficiency by 30%.

Indian Institute of Technology, Roorkee — Roorkee, India
National Summer Intern — *May 2022 - July 2022*

- **Biomag Epilepsy Challenge**: Contributed to improving epilepsy localization techniques, increasing model accuracy by 20%.
- **Applied Machine Learning**: Implemented machine learning algorithms using MATLAB, enhancing data analysis processes.
- **Optimized Workflows**: Streamlined processes in a Linux environment, leading to a 15% reduction in task completion time.

Education

Government College of Engineering and Research — Pune, India
Bachelor of Engineering - Electronics and Telecommunication; CGPA: 9.02 — *June 2020 - June 2024*

Other

- **Google UX Design Professional Certificate (Auditing)**: Exploring UX design principles, user research, prototyping, wireframing, and accessibility through the Coursera program by Google.
- **Fergusson College Hackathon**: Led a team of 3 to win against over 500 participants through innovative solutions and rapid prototyping.
- **Eyantra Robotics Competition**: Managed a 3-member team through all project phases, focusing on refining technical processes and ensuring project milestones were met.
- **Innovation Club Mentorship**: Guided 20+ junior members in project development, fostering collaborative growth.
- **Theater Productions**: Performed in lead roles, demonstrating leadership, teamwork, and public speaking skills.
